PHYSICAL THERAPY AND WELLNESS

Carolyn Silan, PT
Waikoloa Village, HI

Pain Relief & the Silan System

Breathe Your Way to Better Health : Diaphragmatic Breathing

1. Place your hands over the lower ribs.
2. Feel your lower ribs expand as you slowly inhale through nose.
3. Place one hand on your chest.
4. Fully exhale through pursed lips, then tighten stomach muscles.
5. You should not feel your upper hand rise with your breath.

Stay Hydrated & Get your Vitamin D

1. Drink water all day . Urine should be clear to light yellow.
2. Injuries occur more when dehydrated.
3. Nerves and Joints are bathed in fluid and require lots of water.
4. Get your daily Vitamin D to reduce pain. 10 Minutes of Sunshine!

Keep Moving

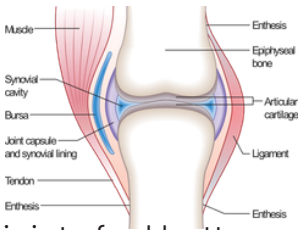

1. Avoid prolonged periods of inactivity like sitting too long
2. Varying your activity is key.
3. Nerves / Muscles / Joints / Bones all rely on regular movement.
4. Sit too much? Lie down and put legs up on couch, bolster, etc.
5. Most daily activity has hands in front. “Undo” this by opening arms on ball.

Joint Mobilization

1. All joints have fluid-filled sac called a “capsule”
2. Adhesions are fibrous, scar-like tissue bands that can cause pain , sciatica , stiffness, and dysfunction.
3. If soft tissues feel firm, you have myofascial restrictions.
4. A Physical Therapist or Self-mobilization can help those joints feel better.
5. Joint mobilization can relieve restrictions, restoring range of motion and function.
